JLD Temperature Controller with Premium Stainless Steel WaterproofPT RTD Temperature Sensor Probe(Threaded) This handy little device allows you to monitor temperatures AND take actions based on temperature. It provides both a relay and an SSR output to turn heating elements or cooling elements on or off based on specific temperatures. This is a low voltage DC version PID Temperature controller. It applies to application where DC is the only source available. Make templates with cardboard for the JLD and thermocouple panel jack. Transfer these templates to the plastic project box and start cutting. My JLD is mounted high on the box as far as I can go, while still being able to attach the wire terminals for pins on the JLD, and leaves enough space for the fan to fit in the box. These temperature controls are designed to cover a broad range of uses for heating and general purpose requirements. Controls have SPST contacts which open on temperature increase or they may be supplied in single-pole, double-throw contact action. Various control ranges are available to cover working temperatures from to ° F (to ° C). Lightobject ETC-JLDA Dual Display PID Temperature Controller. Mar 14, · Versatile Temperature Control Device Model JLD MD I D I see on it where to hook up the SSR output and where to hook up the the - + for the thermocouple but I am not sure how to determine which is which, (- or +) on a thermocouple. Not sure where to hook the power? I had tried to order the TET but they sent me the new JLD PID. so please help. what I have found was this guys website and he has some crazy setup maybe this is the difference in the TET vs the JLD? has his TET setup like it is on v, but I do not think that is right at all. but from what I have read is that the JLD is not the same or the guy below has went off the rails. recent downloads: sony xr-c gemsy model gem sanyo plcea machine a laver lg wd kenwood cjlw25 e one w6 telecommande tp airwell ctrl sam 02 bosch scholtz ceran yanmar blaupunkt reno sqr 46 manual yanmar b 1 samsung m holzingerhrwm ikea induction nutid hin4t wertheim x lg wdwb casio wave septor. temperature) in a range from 0 to %RH and to 70 °C. By scrapping together parts that are readily available on eBay and Amazon, I was able to build a self-contained device that heats and circulates water while maintaining a temperature accurate to.1 degree Celsius (yes, point one degrees!). Temperature controllers are used to regulate temperatures without extensive operator involvement. Temperature controllers can be used in a wide range of applications. Certain features should be considered before selecting a temperature controller, with the most important being the controller's temperature range. Manuals and free owners instruction pdf guides.
